The Championship Elite Package is an all-inclusive athletics timing system with two photo-finish cameras and an IdentiLynx head-on video camera so you can capture 3 different views of the finish line. The system meets all IAAF timing guidelines and enables you to produce accurate, full-color, reverse-angle results.

The reverse-angle camera and IdentiLynx video are especially useful in races where the view of an athlete’s torso may be obstructed by another competitor - making it difficult to establish a finish order. In this case, you can see three different time-synchronized views of the finish line in order to evaluate a very close finish with accuracy to up to 1/2000th of a second.
The Championship Elite Package includes all the components from the Championship package (like IdentiLynx, ACM, and an LED display), as well as a 3+ meter camera tripod and key networking enhancements like SeriaLynx and NCP so you can integrate serial devices across your timing network.

The package also includes two EtherLynx Vision cameras for full color, reverse-angle results. Both Vision cameras include Automatic Capture Mode and come outfitted with remote control features for easy setup and adjustment at your venue’s finish line. The primary Vision camera also includes several premium upgrades that will enhance the ease and quality of your race captures.

**LuxBoost** - LuxBoost greatly amplifies the brightness during low-light captures. Evening events that were once too dark to capture can be recorded with ease.

**Onboard Level** - The on-board level upgrade allows you to monitor that the camera is level directly from within the FinishLynx software.

**Internal Battery Backup** - The primary Vision comes with an internal battery pack that allows the camera to continue running in the event of a power outage.

**Electronic Filter Control** - This upgrade allows you to enable or disable low-light camera filters on your Vision camera right from within the FinishLynx software.
