COMPETITION ELITE PACKAGE

FINISHLYNX COMPETITION ELITE PACKAGE FOR ATHLETICS

This is an all-inclusive, single-camera, full-color photo finish system for athletics. The package contains several key enhancements over the Competition Package, including the RadioLynx wireless start system, the patented Lynx Automatic Capture Software plug-in, and a remote control lens.

The Automatic Capture & Virtual Photo-Eye Plugin

This is a powerful software add-on that performs two key functions. First, it allows the software to automatically capture images whenever an athlete crosses the finish line without the need for an external photo cell. That means timers don’t need to press and hold the capture button. Secondly, it enables the software to automatically send a split or finish time to display clocks whenever the lead athlete crosses the finish line.

Remote Control Lens Functions

Because finish line cameras are often mounted well above eye-level, the Remote upgrade ensures the camera is easily adjustable. This motorized accessory allows operators to make mid-meet adjustments to account for changes in light levels, glare, and shadows. A simple click on the remote adjustment icons will adjust your lens or field of view without having to climb a ladder to reach your camera.
The RadioLynx wireless start system will eliminate the need to run cables to all the start locations around the track. The secure wireless transmission technology is powerful, portable and reliable.

Even a missed or interrupted transmission is no problem – a press on the repeat button will re-send the race start time to FinishLynx. With a response time of less than 1/1000th of a second, RadioLynx is fully compliant with IAAF Rule 165:14 and can be used at major international athletics competitions.

**EtherLynx Vision Camera Features**

The Vision camera is the latest in a long line of powerful EtherLynx photo-finish cameras. Key features include:

- **EasyAlign** Full-Frame Video Alignment for easily aligning your camera on the finish line
- **Power-Over-Ethernet** so the camera doesn't require AC power at the finish line
- **Full-Color Images** so you can produce high-quality results images for immediate printing or online posting
- **Gigabit Transfers** so you can transfer FAT results data in real time at up 1,000 Mbps
- **Virtually unlimited captures** limited only by your hard drive - capture every lap in a 10k race
- **Additional Upgrade Options** include LuxBoost low-light capture, On-Board Level, and Internal Battery

**FinishLynx Competition Elite Package for Athletics**

RadioLynx: IAAF-Compliant Wireless Start System

*Computers and starting pistol not included in package*
