**FinishLynx Timing System**

Dear Sirs,

The IAAF has examined the FinishLynx digital photofinish and timing system developed by Lynx, based on the technical documents, which were sent to IAAF by the manufacturer.

**After examining the equipment, the IAAF concluded that the FinishLynx Timing apparatus satisfies to IAAF Rules and is eminently suited to international athletic competitions.**

**The above equipment has been successfully used at major international track and field meetings in United States and abroad.**

As you probably know, the IAAF Certification System does not cover timing equipment but will soon define the technical specifications and test procedures for this equipment to be certified.

Yours sincerely,

  
Benoit Laroche  
IAAF Technical Officer
