What's New

User Interface Improvements

- » Added Splash screen
- » Added 1/4, 1/2 and 3/4 buttons in data entry screen
- » Changed *IAAF* text to *World Athletics*

Scoreboard Plug-In Enhancements

The scoreboard plug-in version 1.53 includes the following updates:

- » Support for new different `::StartList` and `::Results` section for results outputs
When the current attempt's mark is blank, FieldLynx will trigger the `::StartList` scoreboard section instead of `::Results` (if applicable). The `::Results` section is the fallback section.

NOTE: In vertical event, the `::StartList` section is available before the first attempt of each height.

- » Removed space before comma in the field series output field (`\14\0b, \14\0c`)
- » Added ResultTV Video Display scripts that take advantage of new video display objects in ResultTV 6.21:
ResultTV_Video_results.lss
ResultTV_Video_standings.lss
