

LynxPad Release Notes - Version 3.20

Version 3.20 (06/01/2015)

- + Added support for using extra fields
- + Added support for season best and lifetime best to seed file.
- + Added support for the FinishLynx User3 field
- + Added support to disable the License field
- + Completed full localization support
- + Added Gender to results reports data file
- + Added the ability to specify the number scorers and displacers for Cross Country races.
- + Fixed import and exporting of relay members
- + Updated User's Guide

Version 3.15 (08/12/2014)

- + Added CrystalReportPreview control to add support for 64-bit operating systems, as well as Windows 8, 8.1
- + Fixed a bug where Competition Open would seemingly open in a random directory. The default is \LynxPad\SampleData, but thereafter it opens in the last directory that the open dialog used.
- + Added a 2 column report for event entries sorted by team or athlete.
- + Added support to write the report template XML files to the user's MyDocuments directory.
- + Added support for mixed gender relays.

Version 3.14 (07/01/2014)

- + Updated the athlete Status codes to use what is in the language file

Version 3.13 (08/07/2013)

- + Updated the import functionality to work properly with mixed gender individual and relay events
