GRAND PRIX PACKAGES

FIELD EVENT PACKAGES

GRAND PRIX

&

GRAND PRIX ELITE

The GRAND PRIX and GRAND PRIX ELITE field event packages represent solutions at the highest level. In addition to all the hardware available at the CHAMPIONSHIP level, the focus of these packaged solutions has been directed at keeping spectators, athletes and coaches informed by the addition of multiple display boards.

Scoreboards are provided for every field event station. Also, the addition of rotating scoreboards capable of displaying up to four lines of text and graphics means that spectators can follow the progress of events as never before. Names, performances, and rankings can all be sent directly from the computers running FIELDLYNX – what is more, the boards can also display graphics and animations. All scoreboards can be used with any Field Event station, and can be switched as operational needs require.
